Prime Minister Praises Prince of Songkla University for Hosting and Participating in World Computer Competition

Prime Minister Prayut Chan-ocha spoke highly of the ACM-ICPC World Final 2016 event, hosted by the Software Industry Promotion Agency (SIPA), Prince of Songkla University (PSU), IBM, and the city of Phuket, from 15-19 May 2016.

The event shows the advancement of Thailand as a digital country. Previously, the event was hosted by more developed countries such as the United States of America, China, Japan, and Russia, and this is the first time to be hosted in the ASEAN region, and Thailand was given the opportunity to showcase its digital capabilities.

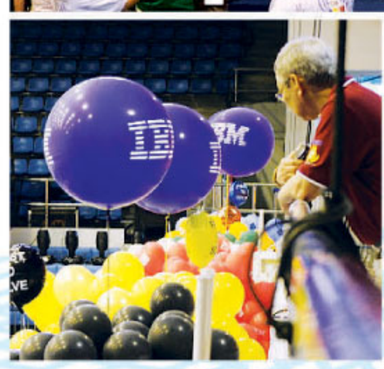
The Prime Minister acknowledged the accomplishments of the Ministry of Information and Communication Technology, SIPA, and all 128 teams from 40 countries, inclusive of two teams from Thailand, namely from Chulalongkorn University and PSU.

One of the benefits gained by Thailand from this event is the development of country's human resources. The event inspires the next generation of computer engineers to strive at becoming world class computer engineers in the future. It promotes creativity, teamwork, and innovation, which will all lead to the advancement of the country. Thailand cannot fail to innovate, when the world is being driven by digital technology.

The second benefit for the country is the economic development. Many youngsters needed to be trained to host this international event of over 1,300 participants. The event has helped improve foreigners' outlook on the country, motivate the new generation, and create new opportunities in the event and tourism industries, which are expected to grow further this year, bringing more capital to the country.

The event was very well received by all participants. The team from St. Petersburg State University, Russia, won the competition this year. The team from Chulalongkorn University won the First Solution Award, being the fastest team to come up with a solution to the first test.

The PSU team, named FEDEX, was able to qualify into the finals, after a qualifying competition among 2,735 universities, with over 300,000 participants, from six continents. South Dakota School of Mines and Technology, USA, will host the next year's event.



The 40th ACM-ICPC World Finals 2016 began officially on 17th May 2016 at the Aiyara Theatre, Phuket FantaSea. Air Chief Marshal Prajin Janthong, Deputy Prime Minister, presided over the Opening Ceremony. The event was attended by many honorable guests, such as Prof. Bill Poucher, ICPC Executive Director; Assoc. Prof. Dr. Chusak Limsakul, PSU President; and Mr. Chamloen Tippayapongthada, Governor of Phuket.

The competition was hosted at Phuket Municipal Sports Stadium, Sapan Hin Sports Complex, Phuket. There were 128 teams from 40 countries and 6 continents competing, including two Thai representatives, namely Chulalongkorn University and PSU.

The ACM-ICPC World Finals 2016 is a world famous international computer programming competition. In order to reach the final round, teams must compete through three qualifying rounds, including local qualifiers, which is a competition among university students from each country; the continental round, comprising of the following regions: Africa, Asia, Europe, North America, and South Pacific; and the World Finals, which is hosted once a year.

Upcoming Events 12

PSU has been chosen by ACM, the world's biggest education and computer science association in the world, to host this event, as ASEAN's first, after being hosted in other more advanced nations such as USA, Canada, China and Japan. This was a great opportunity for Thailand to showcase its information and communication technology capabilities on the world stage.

The FEDEX team from PSU, comprising of Mr. Thanapol Anantachaiwanit, Mr. Arif Waram and Mr. Napat Won-gwan-ngam, won the ACM-ICPC Southern Thailand Competition in 2015, and was one of the two Thai teams participating in the final round. The team members revealed that they were very excited to participate in the final competition. The difference between the local and world's stage was the biggest difficulty of the tests, which raised the level of competition. After winning the local competition last year, the team was practicing with more difficult tests, and also had the help of their professors on how to tackle these tests. They also accessed a compilation of tests from previous competitions available on the website of ACM ICPC, and used a test-based training with increasing complex tests, where more mathematics was require.

FEDEX admitted that the greatest pressure they felt came from the neighboring countries' teams, who were skillful and well-trained for this competition. In some countries, anyone who wishes to enter the competition must take a special class. However, the FEDEX team operates only as a club, which is amateur-like level. Practicing with tests also helped the team improve their English skills.

PSU ranked as Quality Asian University by Quacquarelli Symonds (QS)

The Quacquarelli Symonds (QS) is a famous world universities' ranking from United Kingdom, which uses an interactive ranking table to explore world's top universities, with options to see the ranking by country, region or subject area. The QS has announced the ranking of leading universities in Asia, with a total of 350 ranks, inclusive of 13 universities in Thailand, as follows:

- PSU is ranked number 8 in Thailand, while Chulalongkorn University leads the Thai ranking.
- PSU is the185th in Asia, while the National University of Singapore is ranked number one.
- Worldwide, PSU is ranked in the 701+ group, while Massachusetts Institute of Technology (MIT) in the United States is 1st in the world.

If we compare the last year's ranking in Asia, Prince of Songkla University's ranking improved from level 191-200 last year to be the 185th this year. Also, the overall number of Thai universities to join the ranking has increased and their positions have improved comparing with the last year's statistics.

The Thai leading universities ranked by QS Asia 2016 University Ranking include Chulalongkorn University, Mahidol University, Thammasat University, Chiang Mai University, Kasetsart University, King Mongkut's University of Technology Thonburi, Khon Kaen University, Prince of Songkla University, King Mongkut's Institute of Technology Ladkrabang, Suranaree University of Technology, King Mongkut's University of Technology North Bangkok, Srinakharinwirot University and Naresuan University.

It was revealed that among the top five most competitive faculties in Thailand are also the PSU Faculty of Education and Faculty of Dentistry with a competitive rate of 1:38. Also in the top ten most popular faculties in Thailand for candidate students, PSU is ranked the 6th with its Faculty of Science having a total of candidates of 1,183 people, and the Faculty of Nursing, ranked 9th, with a number of candidates of 1,150 people.

Explore PSU Hat Yai Campus through Google Street View

As of now the routes and directions inside PSU campuses can be seen through Google Street View. Google Street View started by revealing the PSU Hat Yai Campus and will continue filming at the other four campuses, in order to make possible for worldwide viewers to see the routes and landscapes within PSU.

The officers from PSU Organisational Relations Office welcomed and facilitated the company's team to make the necessary recordings for this purpose, as one of the advocates of the university's policy for making known PSU worldwide.

Asst. Prof. Dr. Pattara Aiyarak, Vice President for Global Relations and Informatics, said that PSU has contacted Google Thailand Company, one of the most influential electronic media in the world, to film and record PSU's routes in Hat Yai Campus first, and later in the other campuses, in order to enable Google Street View at PSU. The technology, used for Google Maps, allows users to see a virtual image of the university from around the world through the electronic media.

At present, people around the world can see various points around PSU Hat Yai Campus via Google Street View, as for example the street in front of the campus, statue of HRH Prince Mahidol, reservoir, Faculty of Dentistry, Computer Center, Sports Complex, Pumpkin Building, museum, Rong Chang (elephant) canteen, Faculty of Natural Resources, etc. Moreover, now Google Street View is working on the routes in Pattani, Phuket, Surat Thani and Trang campuses.

PSU Phuket Campus towards an International-Standard Campus

Assoc. Prof. Puwadon Bootrat, Vice President for Phuket Campus, presented the Phuket Campus Development Plan towards becoming an international campus, during the University Council's meeting on May 21, 2016. PSU Phuket Campus is located in a strategic area with Phuket province being a world-renowned tourist destination. Following the government's policy, Phuket is meant to be a Smart City, an economic and social digital city or a Digital Hub. It is one of the nine Super Clusters of the Thai government, which represents the collective strength of the future industry using high technology. This makes PSU Phuket Campus suitable to become an International-standard Campus, as one of Asia's centers of hospitality services and tourism, with distinction in Thai and ASEAN languages and cultures, information technology, environmental and natural disasters management, strengths that also support community's development. PSU Phuket Campus also aims to be an institution that produces quality graduates who participate in international networks and create valuable research focused on solving local problems to be applied into practice for further innovations.

PSU Phuket Campus is ready to become an international campus with international curriculum and outstanding teaching. The Faculty of Hospitality and Tourism, Faculty of Technology and Environment, Faculty of International Studies, Department of Computer Engineering, Interdisciplinary Graduate School of Earth System Science and Andaman Natural Disaster Management (ESSAND), and International College of Arts and Sciences Phuket (ICASP) are located in this campus. Moreover, Phuket Campus provides facilities and other supporting agencies such as the International Affairs Centre (IAC) and dormitory for foreign staff and students.

The strategy towards becoming an international campus is divided into four goals:

1. To produce graduates of high-international value by developing students' knowledge and awareness on the importance of multiculturalism, and make students be part of the international community to develop a better and universal teaching management.
2. To become an innovative university that produces quality international research and creates new knowledge, with future innovation and commercial development in the industrial sector. To create the graduates' database to support the "research university" status.
3. To develop the academic and supporting staff to reach the international performance standards.
4. To development both academic and physical facilities to reflect the internationalization and to broadcast and promote university's reputation.

As an international campus, PSU Phuket will contribute to a quality of education equivalent to leading universities in the region. Graduates will have the language ability and the skills to succeed in the worldwide labor market, and the number of international students will increase as a result of reaching the internationalization goals.

The University Council has suggested that university should develop a policy to increase the international programs in all five PSU campuses. The development of Phuket Campus as an international campus should follow the quality assurance system EdPEx for development and use rebranding to support accomplishment of the target. Considering Phuket Campus' location and resources, the programs should concentrate on the areas of tourism, natural resource and environment. In addition to teaching in English language, the campus should organize activities which encourage the use of English in everyday life. This is a way to also promote a faster development of the English language.

For PSU Phuket Campus to reach the standards of an international campus, it should comply with the development plan of Phuket province, coordinate and work in partnerships with both public and private agencies, and be involved in the progress of the Smart City of Phuket province following government's policy. The campus should also have a center to educate the general public in Tourism Management, develop cooperative projects and seek research funding from external sources, as well as to organize academic conferences for exchanging knowledge with other countries.

PSU Academic Conducts Research on Growing Melons using Local Resources to Handle Unpredictable Climate Changes

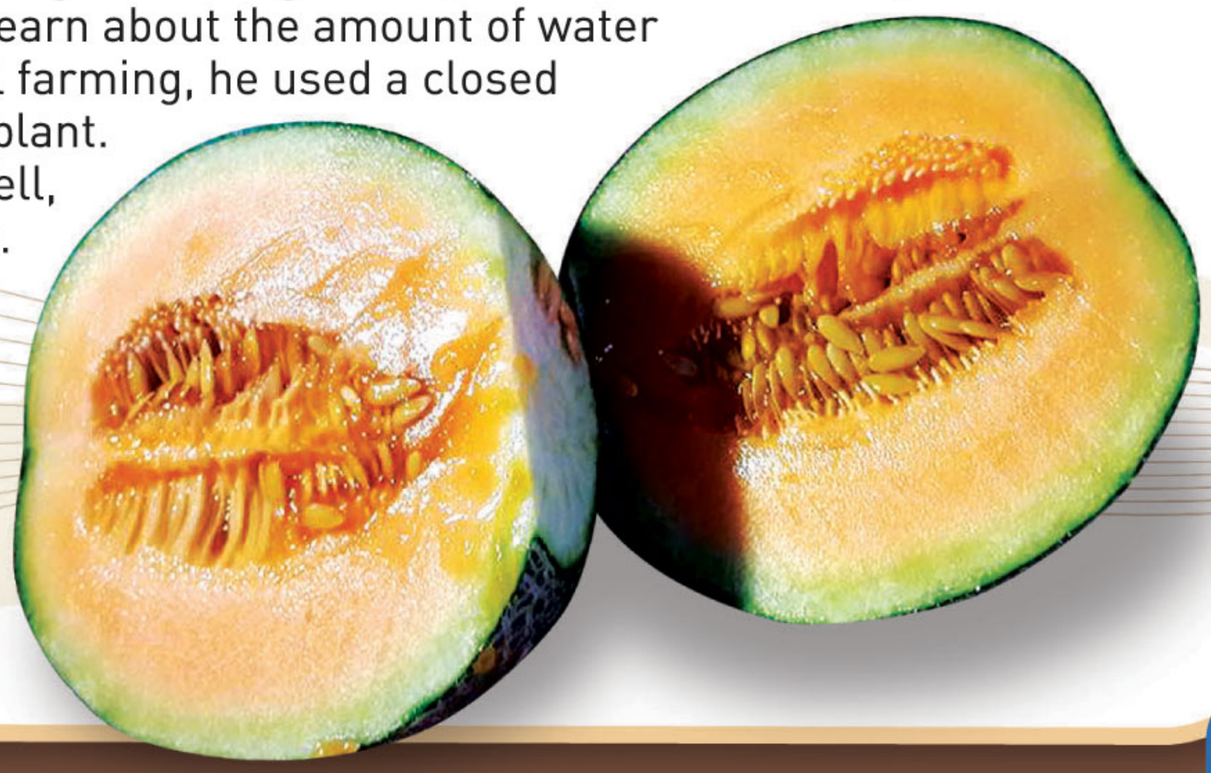
Assoc. Prof. Dr. Manoon Sirinupong, lecturer at the Department of Technology and Industry of the Faculty of Science and Technology, PSU Pattani Campus, and Head of the research team on "Environmentally-friendly Non-soil Farming of Melons", referring to the research on growing melons using local resources, said that there have been trials on growing sprouts without using soil but sponges to create a water system, and growing the sprouts with sawdust from rubber plants and coconut shells. These organic fertilizers are mixed with nutritious substances for the plants. The water is controlled, so plants only receive as much as they need. However, the greenhouse must be well-managed because melons have many threats, especially mealybugs since the humidity creates a perfect habitat for them. The research team is still searching for the best solution to the bugs' problem.

Melons take three months to grow, from the time of planting the seeds until cultivation. The difficulty is the requirement of grower's constant attention to details. Even though it is a plant that requires little water, farmers need to consistently pay great attention to the water system.

"When we first began, we focused on using water efficiently. Using a non-soil growing method in still water leads to certain amounts of water becoming waste that needs to be replaced. However, we do not want to waste the water, so we work on a water treatment system, which will help transform the water, perhaps by adding certain compounds to it. The goal is to reuse the water for growing other plants, without compromising its quality. In this research, both vegetables and fruits were used, such as tomatoes. The plan was to use the recycled water for raising fish. If fish can live in it, then the water is considered to have returned to nature without negative effects on the environment. We will then use the water from the fishpond again for farming. The water cycle continues as such, and water will be used in the most responsible way," explained Dr. Manoon.

Dr. Manoon also pointed out that the best plants to grow during the dry season are obviously plants that require little water. Farmers should learn about the amount of water needed by each plant. In his research on non-soil farming, he used a closed water system to examine the limitations of each plant. During the dry season, vegetables do not grow well, but fruits perform much better, such as melons. The climate in the South has changed drastically in recent times, so farmers need to adapt and consider changing their old ways of farming. All these will require new investment and a market for the products.

News from PSU, Pattani Campus Radio Station.



Universitas Pembangunan Panca Budi Medan at PSU

On April 20, 2016, two distinguished delegates from the Universitas Pembangunan Panca Budi Medan (UNPAB), Indonesia, visited PSU Hat Yai Campus to discussed possible future cooperation with PSU. Dr. Ir. Bhakti Alamsyah, Vice Rector for Academic Affairs, and Dr. Mulkanuddin Ritonga, Lecturer, were warmly welcomed by Asst. Prof. Dr. Pipat Chooto, Assistant President for Public Relations; Asst. Prof. Dr. Chutima Tantikitti, Associate Dean for International Relations and Graduate Studies of the Faculty of Natural Resources; and representatives from the PSU International Affairs Office.

During the meeting, the discussions focused on future possible collaboration, such as exchange programs, joint research, joint international seminars and publications, as well as dual or joint degree programs. A future UNPAB staff development program at PSU was also considered. All participants also shared experiences on universities' e-learning programs and scholarships.

Delegates from UIN Sunan Gunung Djati Bandung at PSU

Drs. H. Habuddin Imam Suhadi, Head of the Administrative Bureau of Academic, Student Affairs and Cooperation; Prof. Dr. Tajul Arifin, Director of Center for Cooperation; and Drs. Zahrudin Rosyidi Syukur, Head of Administration of Center for Cooperation; from Sunan Gunung Djati State Islamic University (UIN) of Bandung, Indonesia, visited PSU on April 26, 2016.

Dr. Sumana Laparojkit, Assistant President for Organisational Relations, together with Dr. Asman Taeali, Deputy Director for Student Development and International Affairs at the PSU College of Islamic Studies, and Mrs. Salma Kosumphant, Head of the International Affairs Office, warmly welcomed the distinguished visitors at PSU Hat Yai Campus.

The objectives of their visit were to discuss future collaboration between Prince of Songkla University and UIN Sunan Gunung Djati Bandung, and to pay a short visit to the College of Islamic Studies, PSU Pattani Campus.

Besides the existing cooperation with the PSU College of Islamic Studies in terms of academic staff exchange, the Indonesian delegates discussed more possible future collaborative activities, such as joint seminars and research. After the welcome meeting, they also had the chance to visit the PSU state-of-the-art library.

SM Sains Hulu Terengganu Delegates visit PSU

Ms. Nor Hayati Yosoff, Principal of Sekolah Menengah Sains Hulu Terengganu, Malaysia, led a group of 10 teachers and 28 students to visit PSU Hat Yai Campus on April 29, 2016. The objectives of their visit were to exchange experiences and learn about multiculturalism at PSU.

Asst. Prof. Supote Kovitaya, Vice President for Student Development and Alumni Affairs; Mrs. Salma Kosumphant, Head of the International Affairs Office; and International Affairs officers welcomed our guests and shared about PSU's experience in the international arena, as well as about our campuses' multicultural atmosphere, which is imparted by more than 400 international students from around the world.

The Malaysian guests also visited the university's modern library and held a colorful cultural show to demonstrate the beauty of the traditional Malay dances. This wonderful presentation was greatly appreciated by a large audience, including students and staff from various PSU faculties and offices.

Distinguished Indonesian Visitors

Prof. Dr. H. Muhibbin, Rector, and Dr. H. Musahadi, Vice Rector for Academic Affairs, from UIN Walisongo Semarang, together with three delegates from IAIN Palangkaraya Kalimantan, led by Dr. Abdul Qadir, Vice Rector for Academic Affairs, visited PSU Hat Yai Campus on May 19, 2016. The objective of their visit was to discuss future academic collaboration with Prince of Songkla University.

Dr. Sumana Laparojkit, Assistant President for Organisational Relations; Asst. Prof. Dr. Nararak Leesakul, Assistant Dean for International, Faculty of Science; and representatives from the PSU International Affairs Office, welcomed our distinguished guests.

During the meeting, the distinguished Indonesian delegates exchanged on their universities' history of cooperation with other educational institutions and expressed their wish of initiating collaborative activities with PSU, such as students and staff exchange, joint seminars and publications, cooperative research and customized training programs. A future Memorandum of Understanding between UIN Walisongo Semarang and PSU was also stated.

H.E. Turkish Ambassador as Honorable Speaker at PSU Pattani Campus

H.E. Mr. Osman Bülent Tulun, Turkish Ambassador to Thailand, together with Mr. Yekta Kamil Noyan, Counsellor at the Embassy of the Republic of Turkey in Bangkok, honored PSU with a visit to Pattani Campus on March 29, 2016. PSU Administrators, led by Asst. Prof. Dr. Pattara Aiyarak, Vice President for Global Relations and Informatics, and Asst. Prof. Chitchanok Rahimmula, Dean of the Faculty of Political Science, warmly welcomed the honorable guests. Mr. Triyogo Jatmiko, Consul at the Consulate of the Republic of Indonesia in Songkhla, also kindly joined the welcoming committee for this auspicious event.

His Excellency thoughtfully accepted an invitation from the PSU Faculty of Political Science, located in Pattani Campus, to be an honorable keynote speaker on two special topics, namely "Synopsis of the Turkish Foreign Policy" and "Turkey-EU Relations". The audience for this notable event included PSU administrators, academic staff, researchers and students, as well as representatives from other local organizations, totaling approximately 200 persons.

His Excellency also took this opportunity to visit the PSU Turkish Studies Center, which was established in 2014, with the objectives of promoting Turkish Studies among Thai students and encouraging a closer collaboration between PSU and Turkish universities.

Furthermore, His Excellency met with administrators from many faculties in Pattani Campus and discussed about further collaboration between PSU and Turkish universities in various areas such as staff and student exchanges, visiting professors and joint research. The meeting was chaired by Dr. Bordin Waelateh, Vice President for Student Development at PSU Pattani Campus.

His Excellency's visit to PSU on this occasion was a great opportunity for the university to strengthen the collaboration and friendship with Turkey.

PSU-BSU
English Camp 2016

May 20, 2016, marked the first day of PSU–BSU English Camp 2016, an event that has been jointly organized by PSU and Ball State University annually since 2001. This year, 135 PSU students had the chance to practice English with fifteen American students and retired administrators from Ball State University, Indiana, USA. In order to ensure the best experience for camp participants, Dr. Kris Rugsaken, the camp's founder and main organizer, has worked closely with the PSU organizing team led by Asst. Prof. Dr. Pattara Aiyarak, PSU Vice President for Global Relations and Informatics.

PSU students spent the entire two-week program with their assigned camp leaders, practicing English both in a formal classroom setting and while taking part in exciting outdoor activities. Camp participants gained memorable experiences in Trang while walking through the canopy walkway of the Peninsular Botanic Garden and visiting Plan Toy Factory; in Krabi, while cruising along Phang Nga Bay and James Bond Island; and in Phuket, climbing the slippery slopes of Phromthep Cape and enjoying the show at the famous Phuket Bird Park.

The fortnight went by quickly; students and camp leaders eventually had to say goodbye, marking the end of this year's English Camp with an exhilarating farewell party at PSU Phuket Campus. The seeds of knowledge and friendship that were planted during English Camp 2016 will continue to grow for years to come. PSU and BSU look forward to welcoming everyone again in next year's camp.

Exchange Program Visit at Jiangxi Normal University, P.R. China

A group of 11 PSU staff and students visited Jiangxi Normal University (JXNU) from 11-25 June 2016, as part of a cultural exchange program under the MOU Addendum 2016-2017 between JXNU and PSU. The group was welcomed by the Vice Dean of the School of Intercultural Studies, and Ms. Hu Yuan, a lecturer at JXNU, along with students from the university.

Program participants had the chance to learn several fascinating aspects of Chinese culture, including Chinese language, calligraphy, and playing a Chinese traditional instrument. Ms. Hu Yuan and the students invited the PSU group to sightseeing trips to the Lushan Mountain and Longhushan Mountain World Cultural Heritage sites; they also visited Tengwang Pavilion, a tourist attraction in Nanchang, as well as interesting places in Nanchang City and Guangzhou Province.

On 22 June 2016, JXNU and PSU students performed a variety of cultural showpieces, highlighting the beauty of Thai and Chinese cultures, for an appreciative audience.

This year, PSU staff and students participating in the JXNU exchange visit gained cultural insight and new appreciation towards the culture of China, the beauty of its locations and the kindness of its people. They also made excellent use of the opportunity to propagate the cultural aspects of Thailand and to contribute to the positive image of PSU abroad. We are grateful to JXNU for the opportunity and look forward to continuing the mutually beneficial collaboration.

Staff and Student Exchange Program at Jiangxi University of Science and Technology, P.R. China

Prince of Songkla University (PSU) and Jiangxi University of Science and Technology (JXUST) have been in a strong and active collaboration since 1994. This year, PSU staff and students visited JXUST from 11 June – 11 July, 2016, in a delegation that included participants from the academic staff exchange, cultural exchange, and industrial exchange programs under the MOU Addendum 2015-2016 between our two universities. PSU delegates were warmly welcomed by Liu Zuwen, Vice President of Jiangxi University of Science and Technology, along with the Director, Deputy Director and staff from the JXUST International Affairs Office.

Under the Cultural Exchange Program, PSU staff and students learned Chinese language basics, with a particular focus on speaking and reading skills; they also got hands-on experience playing "Guzheng", a Chinese musical instrument. PSU students performed Thai classical dances, showcasing the unique cultural aspects of each region of Thailand, to an appreciative Chinese audience.

Under the JXUST Academic Exchange Program, PSU lecturers from the Faculty of Engineering, Faculty of Management Sciences, Faculty of Science and Industrial Technology, and Faculty of Liberal Arts and Management Sciences visited relevant JXUST faculties. They received a warm welcome from the Dean of the relevant faculties. The visiting PSU lecturers presented their research and discussed collaboration possibilities with their JXUST colleagues.

This year marked yet another successful staff and student exchange visit with Jiangxi University of Science and Technology. Taking full advantage of the new MoU Addendum, new activities have been carried out, widening the vision and knowledge of PSU staff and students, strengthening the friendship between the two universities. We are looking forward to the continuation of this successful collaboration with JXUST.

Staff and Student Exchange Program at South China Agricultural University, P.R. China

A group of PSU lecturers and students from the Faculty of Natural Resources, Faculty of Engineering, Faculty of Management Sciences, Faculty of Communication Sciences and Faculty of Science and Industrial Technology visited South China Agricultural University (SCAU) from 22 May – 4 June 2016, under the Staff and Student Exchange Program. On 23 May 2016, PSU delegates were welcomed by Mr. Feng Lixin, Director of International Relations of SCAU. On this visit, PSU lecturers and students exchanged knowledge and experience with their relevant SCAU counterparts, and learned about several aspects of the Chinese culture.

International and English Programs at Prince of Songkla University

Whether you are looking for an undergraduate or postgraduate degree, PSU offers a range of opportunities and support services, with friendly staff and several useful resources, in order to help you succeed and achieve your academic goals.

Hat Yai Campus:

PSU's main campus is located in the busy, commercial city of Hat Yai in Songkhla province, the hub of trade and economy of the major provinces in the Lower South. Hat Yai campus, with its attractive landscape, provides a serene setting ideal for education and learning and is the center of various disciplines, including Health Science, Science and Technology, Engineering, Management Sciences, Liberal Arts, Economics, Law, Natural Resources, Environment Management, and Agro-Industry.

Undergraduate Level

- B.B.A. in Management
- B.Sc. in Digital Media

Postgraduate Level

- M.A. in Teaching English as an International Language
- M.B.A. in Business Administration
- M.N.S. in Nursing Science
- M.Sc. in Biotechnology
- M.Sc. in Cosmetic Sciences
- M.Sc. in Ecology
- M.Sc. in Epidemiology
- M.Sc. in Herb Sciences
- M.Sc. in Natural Rubber Production, Technology and Management
- Ph.D. in Biotechnology
- Ph.D. in Computer Science
- Ph.D. in Epidemiology
- Ph.D. in Nursing
- Ph.D. in Social and Administrative Pharmacy
- Ph.D. in Teaching English as an International Language

Pattani Campus:

Situated on the seafront in Pattani Province, it is a campus with a multicultural society, the center of diverse cultures and traditions, and rich in resources. It offers education in Social Sciences, Humanities, Fine and Applied Arts, Political Science, Education, Islamic Studies, Communication Technology, Nursing, Rubber and Polymer, Food Technology and Fisheries, corresponding with the context of resources and cultural life of residents of the Lower South, with their own identities. One of the main studying features of the Pattani Campus is that it embraces the College of Islamic Studies where Arabic, Islamic theology and Shari'ah subjects are in high demand.

Undergraduate Level

- B.A. in Chinese
- B.A. in Islamic Studies

Phuket Campus:

It is set on the island of Phuket, also known as the Pearl of the Andaman Sea. The island is well-known worldwide for being a tourist attraction and a busy center of hotel industry and services that suit both national and international tourism. Thus, it is not surprising that Phuket campus concentrates on teaching and learning in Tourism and Service Industry, Foreign Relations, Information Technology, and Earth Science, and aims to be an international campus, befitting the status of Phuket as a world-class tourist resort. In response to the government policy, the campus is also promoting the software industry.

Undergraduate Level

- B.A. in ASEAN Studies
- B.A. in Chinese Studies
- B.A. in European Studies: English-French
- B.A. in International Business: China
- B.A. in International Studies: International Business: Korea; Korean Studies
- B.A. in Thai Studies
- B.B.A. in Hospitality Management
- B.B.A. in Tourism Management

Postgraduate Level

- M.A. in Chinese Studies
- M.B.A. in Hospitality and Tourism Management
- M.Sc. in Environmental Management Technology
- M.Phil.in Earth System Science
- Ph.D. in Environmental Management Technology
- Ph.D. in Earth System Science

Surat Thani Campus:

Surat Thani Campus, established in the cultural and economic center of the upper southern provinces, offers education services in Science and Industrial Technology, Liberal Arts and Management Sciences, in support of the growth in industrial businesses of the Upper South. It is a leading tertiary education center of the Upper Southern Thailand with the mandate to produce competent graduates, to provide academic services to community, and to preserve heritage in arts and culture.

Postgraduate

- M.Sc. in Aquaculture
- Level: Ph.D. in Aquaculture

***All Graduate Programs can accommodate international students: www.grad.psu.ac.th**

***More details: www.en.psu.ac.th and www.interaffairs.psu.ac.th**

UPCOMING EVENTS IN 2016

Prince of Songkla University

SEP 19-21

International Bioscience Conference and the 6th International PSU-UNS Bioscience Conference IBSC 2016

Place: University of Novi Sad, Faculty of Sciences, Trg Dositeja Obradovića 3, Novi Sad

Organizers:

- Faculty of Sciences, University of Novi Sad, Serbia
- Prince of Songkla University, Thailand
- Drug Delivery System Excellence Center
